Mattia Cippone

Automation Dev & Business Analyst

Bari, Italy | mattia.cippone@protonmail.com | LinkedIn | mattia.cipp.one

Profile

I design cloud and desktop workflows that automate business processes and integrate AI into day-to-day operations. My background in functional analysis helps me turn business requirements into solutions I can build, test and deploy.

Experience

Automation Developer | Deloitte Dec 2024 – Present

- Take automation projects from technical feasibility and requirements definition through testing and production deployment. Use Power Automate for cloud flows and Power Automate Desktop and Blue Prism for RPA.
- Built and configured the Microsoft Azure virtual machine infrastructure that runs unattended desktop automations.
- Introduced AI-assisted development practices within the team and explored how AI could enable new automation projects for the client.

Functional Analyst | Deloitte Mar 2023 – Dec 2024

- Gathered requirements through discussions with clients and development teams and wrote functional specifications for banking and automotive platforms.
- Supported QA testing, maintained project documentation and tracked defects in Jira. Introduced JavaScript userscripts to automate repetitive browser tasks during testing.

Selected project

pad-mcp – An MCP server for writing Power Automate Desktop flows using shared code snippets and action references.

Technical skills

Power Automate, Power Automate Desktop, Blue Prism, Microsoft Azure (virtual machines), n8n, JavaScript, Git, Docker, Jira.

Education and certifications

Diploma in Computer Science and Telecommunications 2014–2019
Istituto Tecnico Panetti, Bari | Final grade: 100/100

Microsoft Certified: Power Platform Fundamentals (PL-900)
Cambridge English: C1 Advanced (score: 193)
